# EMBRACO IN PILLS

**MORE THAN 11.500 EMPLOYEES**

**MORE THAN 400 PROFESSIONALS IN R&D**

**PRODUCTION CAPACITY OF OVER 38 MILLION COMPRESSORS PER YEAR**

**MORE THAN 400 MILLION PRODUCTS PRODUCED TO DATE**

**MORE THAN 1.000 PATENTS WORLDWIDE**

**BUSINESS CONDUCTED IN MORE THAN 80 COUNTRIES**

**R&D LABORATORIES IN 4 CONTINENTS**

**EMBRACO** is a company specialized in cooling solutions and world leader in the hermetic compressor market. **Our mission:** provide innovative solutions for a better quality of life, always attentive to technological excellence and sustainability.

Technological leadership, operational excellence and sustainability are some of the pillars which ensure the EMBRACO differential over other companies in the world market. Its products are now considered the favorite leading home appliance manufacturers by major automakers and are spotlighted by manufacturers of commercial refrigeration equipment.

With global operations and production capacity exceeding 38 million units a year, the company offers solutions that are differentiated for their innovation and low energy consumption. Its 11.500 employees work in factories and offices located in Brazil (headquarters), China, Italy, Slovakia, Mexico, the United States and Russia.

Energy efficiency is constantly sought in the processes, products and relationships with the communities where it operates. Our company is the absolute leader in this segment, being able to offer products that meet the most restrictive international standards regarding energy consumption.

As a worldwide leader, **EMBRACO** tries to anticipate market changes, and in doing so, our company is in a state of permanent transformation. We continuously assess our processes in order to maintain our leadership within the industry and promote growth, without forgetting the pillars of our organization.

## HIGH EFFICIENCY

Energy efficiency is the base for all our product development. This means producing compressors that consume each time less energy and less raw material in manufacturing, at the same time maintaining **Embraco** brand quality. Thus, we continuously invest in research and development to create products that are more efficient and silent and do not harm the environment.

As a result of efforts to increase energy efficiency in our products, and to surpass our customers' highest expectations, we have developed **Embraco Fullmotion** – a compressor that varies the cooling capacity according to the need, providing a reduction in energy consumption up to 40%.

We have a full product portfolio that offers compressors of a wide ranges of efficiency. We are a global benchmark in developing solutions that meet the strictest international standards regarding energy consumption. With a commitment to seek continuous product and process improvement, each new generation of **Embraco** compressors is more efficient than the previous one.

## GREEN SOLUTIONS

**Embraco** has always been committed to offer solutions to the market that go beyond the traditional ones. We have been at the forefront, for example, in launching products compatible with the most environmentally advanced refrigerant gases. We were the first organization to produce compressors that use alternative fluid refrigerants, such as propane (R290), to replace HFCs.

This natural refrigerant has important ecological advantages, since it does not contribute to ozone layer deterioration and has a limited greenhouse effect. Furthermore, its noise levels are low, while its efficiency rate gain and cooling capacity is quite high. To know our product portfolio in R290 contact our sales team.

# YOUR BEST CHOICE IN CONDENSING UNITS

**Embraco**, the technology and market leader in hermetic refrigeration systems reinforces its talent for innovation and creates a new business unit. Partnership is the key word that translates, innovative and exclusive solutions. A global structure of **Engineering, Manufacturing and Laboratories** ensures a quick response to customer requirements, offers a complete line of refrigeration products including: Condensing Units, Sealed Refrigeration Units, Heat Exchangers and other components; all developed from specific customer needs and designed for a wide range of applications.

## Advantages

 **Flexible range of solutions - From the manufacturing of a product originally designed**

by the customer to turnkey solutions, including the development and production of a customized line of Condensing Units and Refrigeration Sealed Units;

 **Optimized development costs and timing -allowing customers to focus on other**

competencies, such as the design and manufacturing of cabinets and the marketing of end products;

 **Simpler supplier base** - Fewer purchased items and inventory management

 **Reduced complexity** - of manufacturing processes

## FEATURES AND BENEFITS

Complete line from 1/7 to 3 HP

Units available for **R134a, R404A / R507 and R290**

100% factory tested

**Reliable, quiet and efficient** hermetic compressors

**Corrosion resistant** materials

**Supertropical Units** - oversized condenser capable of operating under high ambient temperature up to 48°C

UL approved for **60Hz** version

**Customized design** (external casing, accessories)

**Low maintenance**

**ROHS free, PED 97/23/CE** - clause 3 par. 3

**Great ecological appeal**

# EMBRACO COMMERCIAL PRODUCT OVERVIEW

## ■ Embraco Commercial Product Overview

### EUROPE RANGE

### BRAZIL RANGE

### CONDENSING UNIT

### FULLMOTION

## ■ Europe Range Commercial Condensing Units

### UEMT

- Low noise
- High efficiency level
- Compact size

**AVAILABLE FOR**  
R134a, R404A, R290  
**APPLICATION:**  
LBP,M/HBP  
**COMPRESSOR FROM**  
4,0 CC TO 8,0 CC

### UNEK/UNEU

- Low noise
- Low vibrations
- High reliability in severe working conditions

**AVAILABLE FOR**  
R134a, R404A, R290  
**APPLICATION:**  
LBP,M/HBP  
**COMPRESSOR FROM**  
7,3 CC TO 16,8 CC

### UNT

- High efficiency level
- Very low sound level
- High cooling capacity at low evaporating temperatures

**AVAILABLE FOR**  
R134a, R404A, R290  
**APPLICATION:**  
LBP,M/HBP  
**COMPRESSOR FROM**  
12,6 CC TO 22,4 CC

### UNJ

- Small size platform
- High energy efficiency
- Reduced noise level

**AVAILABLE FOR**  
R134a, R404A  
**APPLICATION:**  
LBP,M/HBP  
**COMPRESSOR FROM**  
21,7 CC TO 34,4 CC

### SLIDING UNITS

#### SCREWLESS ACCESS

- Easy access for technician
- Stackable
- Energy efficiency
- High quality

**AVAILABLE FOR**  
R134a, R404A  
**APPLICATION:**  
LBP,M/HBP

## ■ Applications & Test conditions

#### (LOW BACK PRESSURE)

LOW EVAPORATING TEMPERATURES (TEMPERATURE RANGE BETWEEN -10 TO -40 C);

**APPLICATIONS:**  
REFRIGERATORS, FROZEN FOOD CABINETS, FROZEN FOOD DISPLAY CASES, DISPLAY WINDOWS, ETC.

### M/HBP

#### (MEDIUM / HIGH BACK PRESSURE)

EVAPORATING TEMPERATURES BETWEEN -20°C AND +10°C;

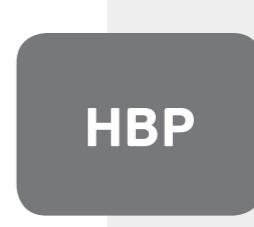

**APPLICATIONS:** COOLERS, MERCHANDISERS, ETC

#### (MEDIUM BACK PRESSURE)

MEDIUM EVAPORATING TEMPERATURES (TEMPERATURE RANGE BETWEEN -10 TO -40 C);

**APPLICATIONS:**  
FRESH FOOD CABINETS, DRINK COOLERS, ICE MAKERS ETC.

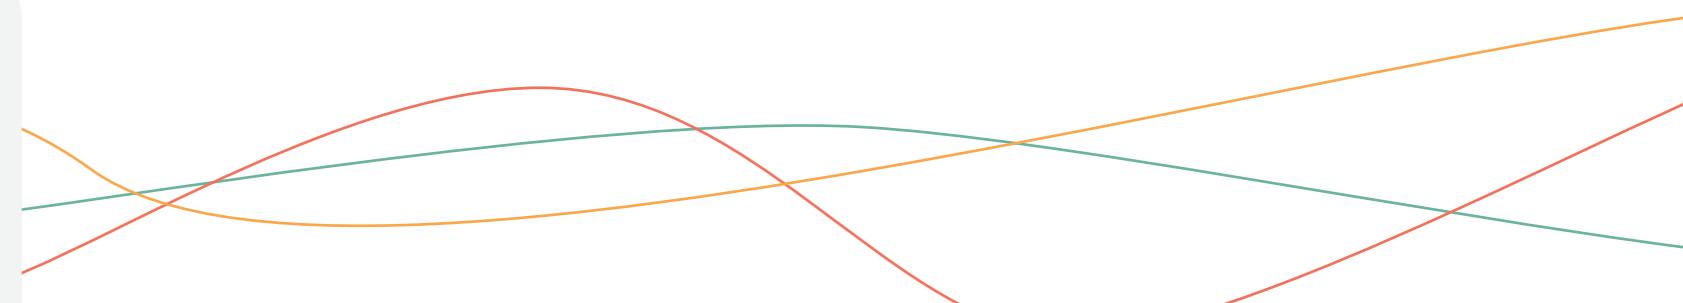

### HBP

#### (HIGH BACK PRESSURE)

EVAPORATING TEMPERATURES, BETWEEN -15 AND +10°C;

**APPLICATIONS:**  
FRESH FOOD CABINETS, DRINK COOLERS, ICE MAKERS, DEHUMIDIFIERS ETC.

TEST CONDITIONS (RATING POINT)	APPLICATION	EVAPORATING TEMPERATURE °C	GAS RETURN TEMPERATURE °C	SUBCOOLING	COMPRESSOR AMBIENT TEMPERATURE °C

# CONDENSING UNIT SELECTION

## ■ HOW TO ORDER YOUR CONDENSING UNIT

### Ordering Code

**NOTE:** not all combinations are possible

### Nomenclature UEM/UNEK/UNT/UNJ

**UNT 6 226 GK**

\* UDX: UDNEK, UDNT, UDNJ  
\*\* depend on refrigerant used

### Electrical motor starting torque

**LST**

**Low Starting Torque:**  
Compressors with RSIR-RSCR-PSC electrical motors for systems with capillary tube and with balanced pressures at start up.

**HST**

**High Starting Torque:**  
Compressors with CSIR-CSR and 3ph electrical motors for systems with balanced or unbalanced pressures at start up.

### Electrical motor types

RSIR	<b>Resistance Start – Inductive Run</b>	
RSIR	This motor type , used in the compressor of small power, has a low starting torque (LST) and must be applied only to capillary tube systems where the pressures equalize. The motor is characterized by a start winding with high ohmic resistance and must be disconnected when it reaches the stabilized rotational speed. An electromagnetic relay, calibrated for the motor current, disconnects the start winding at the end of the start up. An alternative to the electromagnetic relay is, for some models, a PTC solid state-starting device.	
RSCR	<b>Resistance Start – Capacitive Run</b>	
RSCR	Similar to RSIR motor version but uses a PTC solid state starting device and a permanent connected run capacitor to improve its efficiency.	
CSIR	<b>Capacitive Start – Inductive Run</b>	
CSIR	Similar to RSIR motor, with a different start winding in series with a start capacitor of suitable capacitance to get a high starting torque.	
CSR	<b>Capacitive Start &amp; Run</b>	
CSR	CSR version with capacitive run and start windings. Same as PSC motor but with a start capacitor in series with the start winding. A potential starting relay, calibrated for each motor, disconnects the start capacitor at the end of the start. The motor is characterized by a high starting torque (HST) and high efficiency.	
PSC	<b>Permanent Split Capacitor:</b>	
PSC	PSC version with capacitive run winding. This motor is characterized by the run capacitor permanently connected in series with the start winding; both remain connected even after the motor starts. The starting torque is enough to guarantee that the compressor starts only with balanced pressures in capillary tubes systems or with a pressure equalizer.	
3Ø	<b>Three Phase</b>	
3Ø	Three-phase windings with star connections
